### **American Express**, New York City, New York — Software Engineer

AUGUST 2019 - MARCH 2022

Full-stack software engineer working on a variety of web products. Working with Javascript plus React on the front-end, and Typescript plus Express on the back-end. Using Selenium, WebdriverIO, and Jasmine for cross-browser automation tests and Jenkins for our CI/CD and deployment processes. Using Jest and React Testing Library for unit tests, as well as the SuperTest npm module for API tests. Promoted from software engineer III to software engineer II.

## EDUCATION

### **University of California, San Diego** — B.S. in Mathematics and Computer Science

MARCH 2019

## PROJECTS

### **Personal Website** - <https://github.com/ssaberan/PersonalWebsite> (WIP)

Written mostly in React. Hosted on Github Pages. Fully responsive and accessible. Features a blog, and a contact form, which handles user input validation using Formik and can be used to send emails to me.

### **Personal API** - <https://github.com/ssaberan/PersonalAPI> (WIP)

Written using Express. Hosted on Heroku and linked to the Github repository to allow for automatic deployments. Allows me to fetch resume and blog post data for my personal website.
